APPENDIX

1987 Import Summary	132
International Trade of Canada Classification of Countries	135

INTRODUCTION

The agricultural and food products import series for Alberta was initiated in 1987. The first two reports, covering 1985 and 1986, presented import values by country of origin. For 1987, a special report based on the results of a comprehensive study of international and interprovincial imports was published under the title A Review of Alberta's Agricultural and Food Products Imports During 1987.

The present report provides import statistics for calendar year 1988. It is unique in presenting information on import quantities and values by country as well as by commodity.

SOURCES AND METHODS

Primary out-of-country imports were obtained from the International Trade Division of Statistics Canada. In a number of cases, adjustments and revisions were made to the primary data to arrive at the figures reported in this publication. Because Statistics Canada reports import data on a province of clearance rather than province of destination basis, these adjustments are necessary to overcome misinterpretations arising from the interprovincial shipments of imported goods once within Canada's borders.

The information utilized to adjust the Statistics Canada data for Alberta and Western Canada was assembled from diverse sources within Alberta Agriculture as well as other government departments and industry. Some adjustments were based on human and livestock populations, and on consumption data. Sometimes the information required for adjustment was gathered or derived from secondary sources, mainly government publications. It is relevant to note, however, that this adjustment process does not fully account for value-added activity in respect of further-processed goods that are shipped interprovincially.

IMPORT OVERVIEW

The value of Alberta's 1988 imports of primary and processed agricultural and food products from all non-Canadian sources was estimated at about $558 million. This compares with $526 million in 1986 and $482 in 1985. Understandably, the largest commodity categories, measured in terms of value, consisted of those products that are not easily produced or raised in this province.

Fruits, vegetables and their preparations, at $247.3 million, accounted for over two-fifths of the import total and constituted the largest commodity category. Whiskey, wine, beer and other alcoholic and non-alcoholic beverages made up a further 9.5 per cent of imports, at $52.9 million.

Imports of fish and marine animals totalled $45.0 million while animal and meat imports amounted to $38.5 million, making up approximately 8 and 7 per cent, respectively, of the import total. Cereals and cereal product imports exceeded $28.2 million, with other foods and food materials totalling $98.7 million. Coffee, tea, spices and soup preparations were major items in this category.

Overall, Alberta accounted for an estimated 7.3 per cent of the Canadian agricultural and food product import total of $7,649 million.

TRADING PARTNER REVIEW

The traditional sources of supply of agricultural and food products for Alberta, and Canada generally, include the United States and, to a lesser extent, the United Kingdom, France, West Germany, Brazil, and Mexico. In 1988 these countries accounted for about $384 million worth of shipments to Alberta, almost 69 per cent of the import total for the year.

United States

The Unites States was the largest source of agricultural and food products imported into Alberta during 1988. It accounted for $303.6 million, or about 54 per cent, of total imports. The major import items included fruits, vegetables and their products at $159.8 million (52.6 per cent), fish and marine animals at $25.9 million (8.5 per cent), cereals and cereal products at $19 million (6.2 per cent), and alcoholic and non-alcoholic beverages at $13.4 million (4.4 per cent). Miscellaneous foods and food material imports, including coffee, spices, chocolates and other cocoa products, tomato ketchup and other sauces, pasta, and protein concentrates amounted to $24.6 million in total.

Brazil

A distant second to the United States, Brazil supplied $21.9 million worth (3.9 per cent) of agricultural and food products to Alberta in 1988, up from $9.6 million in 1986 and $11.7 in 1985. Import items consisted almost entirely of orange juice concentrates and coffee.

United Kingdom

Agricultural and food product imports into Alberta from the United Kingdom totalled $17.8 million in 1988, down from $18.7 million two years earlier. Beverages (mainly whiskey), specialty food items like tea and chocolate, and cereal preparations such as sweet biscuits, waffles and wafers constituted about 85 per cent of the import total, at a value of $15.1 million.

France

Imports from France were valued at $15.1 million or 2.7 per cent of the total Alberta imports of agricultural and food products. Wine and beer, cheese, sugar confectionary, and cocoa products made up the majority of these imports.

Mexico

Mexico accounted for 2.3 per cent of Alberta's 1988 agricultural and food products imports, at an estimated $12.9 million. The main import items included fruits and fruit juices, vegetables, coffee, and alcoholic beverages.

West Germany

Alberta's imports of agricultural and food products from West Germany in 1988 was estimated at $12.4 million, down from $13.7 million in 1986 and $13.5 million in 1985. Grape wines and beer constituted a significant proportion of the imports.

Others

In addition to those countries identified in the foregoing, numerous others, generally controlling small but stable niches in the Alberta and Canadian markets, supplied a wide array of commodities to this province in 1988. Principal among them were the Netherlands ($9.8 million), Italy ($9.6 million), Colombia ($9.4 million), Chile ($9.3 million), China ($8.2 million), New Zealand ($7.8 million), and Australia ($7.3 million).
